PRESSETEXT

"A short time ago in a Bundesland not far away, Bielefeld (Nordrhein-Westfalen) to be precise, was born the best band ever to come out of Germany since Boney-M.

Lars (singer/guitarist/keyboards), Maxi (singer/bass), Tim (drums) and Seb (everything else a band could possibly need) have produced a fine debut album, a string of Inventive videos and live performances, that have wowed audiences across the length and breadth of Germany. The world will, at some point, be their oyster.

Singles like Kings of Obesity, Fill My Level Up and Making Someone Whole have only confirmed their brilliance to a wider audience.

A second album is currently in the pipeline and promises to elevate this threesome/quartet to a level where the music world will have prick up their ears and take notice.

Fantastic, inventive rock music played by a bunch of talented musicians with a smile on their faces.
